1. Biography- Qualifications:

Elected in 2014, Merrill Beyeler has served one term in the House of Representatives. Merrill and his wife Sharal have 5 children and 15 grandchildren. Merrill is an Idaho native whose family has ranched Lemhi Valley since 1959. Merrill is a graduate of Boise State University with a degree in Education.

Merrill is a leader in civic, church, business and community affairs. He is known for his ranching and livestock production in Leadore. He is a respected father, rancher, and community leader and is also a former teacher. He works hard and has the ability to unite neighbors to accomplish common goals. He rolls up his sleeves to get the hard work done.

2. Why vote for me? My top priorities?

A couple of years ago we started on a journey together. Our goal was to see if we could bring people together and make a difference. And that's just what we did. Thank you.

Exciting things have happened during my two years in office. The creation of Rock Creek Project is an amazing piece of ground – an entire watershed of more than 20,000 acres. I have been honored to help bring together the University of Idaho, the Idaho Cattlemen's Association, conservation groups and agencies to help solve the most pressing questions of our time in land management.

The conversations are leading to better outcomes, protection of critical lands and ensuring access to our public lands in order to use our natural resources. If we want this to continue, the May 17 Republican Primary Election is critical. We are at a crossroads as a state and as a country. I hope I can get your vote so we can make continued progress for Idaho.

Working together and solving problems is the pathway to the future. We have come a long way in two short years:

- We are investing millions of dollars in rural broadband Internet.
- We have made sure the state provides better support for our local schools.
- We are helping more Idaho children find a pathway to college and careers.
- We've done all of this, while maintaining the lowest tax rate in the mountain west.
